Bugs Bugs Bugs

Bugs! Bugs! Bugs! / By Bob Barner. San Francisco, Calif.: Chronicle Books: 1999. WWL call number 281299

Readers will love the large, colorful illustrations and text that revel in the glory of the world of bugs (and spiders). A Bug-o-Meter at the end tests reader's knowledge of the insect realm. For children in grades Preschool-1.

Insectlopedia / By Douglas Florian. San Diego, Calif.: Harcourt, Inc.: 1998. WWL call number 281297
Termites, crickets, weevils, dragonflies and their relatives are the subject of Florian's playful poems and watercolor illustrations-a real treat. For children in grades Preschool-3.

Insects are my life / By Megan McDonald. New York: Orchard Books: 1995. WWL call number 271257
Amanda wants to grow up and become an entomologist but her family and schoolmates do not appreciate her interest in bugs. But Amanda continues to champion her cause and eventually finds a friend she can relate to. Anyone who is passionate about their interests despite opposition will love this book! For children in grades 1-6.

Water insects / By Sylvia A. Johnson. Minneapolis, Minn.: Lerner Publications Co.: 1989. WWL call number 281346

Clear and interesting text describes the physical characteristics, behavior and life cycle of many insects that live in the water. For children in grades 3-7.
